

Application to NORBIS open funding call for international conferences and courses

NORBIS is the Norwegian research school in Bioinformatics, Biostatistics and Systems Biology, founded in 2015. The school is a collaboration between eight Norwegian universities and aims to build and unite competences at a national level. We develop new courses, build educational tracks, and promote a new scientific community. It is our aim that our graduate students will contribute strongly to methods development within bioinformatics, biostatistics and systems biology, and that they will drive and contribute to the most important scientific projects in molecular life sciences in Norway and internationally.

NORBIS encourages you to benefit from international expertise and to expand your international network. We have funding available to support this, and now invite you to apply for financial support for attendance at international conferences and courses within the topics bioinformatics, biostatistics and systems biology, for example EBI Welcome Trust courses within the topics of bioinformatics: <https://www.ebi.ac.uk/training/>

This is an open funding call without a deadline but with a fixed budget and the applications will be evaluated as they are received. You can apply for a maximum amount of 20.000. If you are interested, please fill in the form below and send your application, a letter of recommendation from your supervisor, and application/registration for a course/conference to contact-norbis@uib.no. The grant will be reimbursed after the travel. If you need an advance stipend, please contact us on the email provided above.

Title and short description (max 100 words) of your PhD project:

What course/conference are you planning to register for? Please include link to course/conference.

What is the purpose of your travel (max 100 words)?

How will the attendance benefit your PhD project (max 200 words)?

Detailed estimate of the budget, including costs of travel, accommodation and other costs, including other sources of funding (Note that NORBIS will not cover expenses that have already received funding elsewhere):
