

Do you work with large and complex biological data sets?

Do you want to learn how to translate these into information that can be interpreted, and maybe even understood, by a wide range of audiences?

Then you should join the 2nd

NORBIS Summer School 2017

Communicating research through visualisation, illustration and storytelling

which will take place in Bergen, August 28 - September 1,

and learn how to:

- ✓ Get better insight into your data through scientific visualisation
- ✓ Create a scientific illustration to communicate your research
- ✓ Present your data in a 'Researcher Grand Prix' style

Interested?
